

Not everything technology related is perfect, especially when it comes to the internet. Unfortunately, there's rare times where Gmail users get their Issues sent straight to the spam folder. <u>Follow these instructions</u> to make sure you receive the issues right at release. It takes all of about a minute to do this.

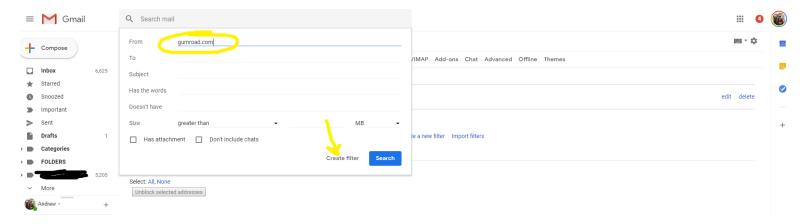

Click Settings (shown above) and then click "Filters and Blocked Addresses"

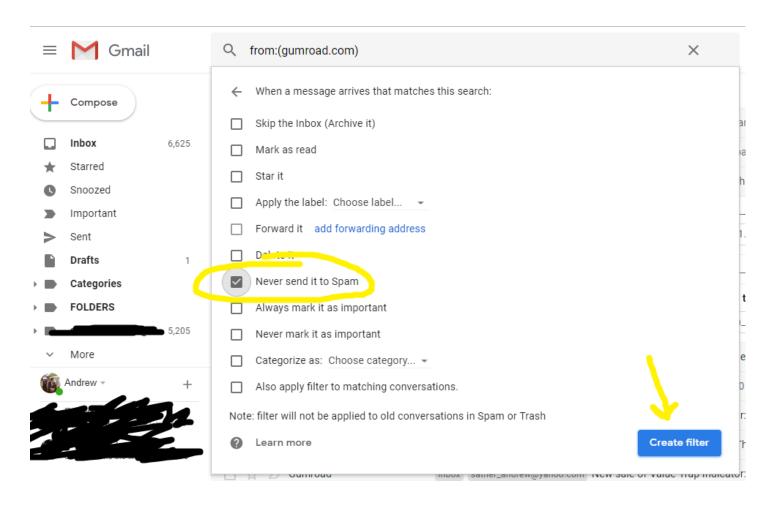

Then click "Create a new filter"

In the "From" box, enter "gumroad.com" and then click "Create filter"

Check the box that says "Never send it to Spam", and then the button "Create filter"

That should do it. Please reach out if you ever have any trouble assessing eLetter issues. They are generally sent out around the first of the month. If you don't see anything in your inbox within the first 3 days, reach out to me: andrew@einvestingforbeginners.com
